

BAI0190_00,BAI0190_01(english)
Probability and statistics
examination

Topics

Basic combinatorics, random variables, probability distributions, distributions, quantiles, mean variance, Conditional probability, Bayes' theorem, base rate fallacy, Joint distributions, covariance, correlation, independence, Central limit theorem, Bayesian inference, hypothesis testing, confidence intervals, and linear regression.

Grade

Offered mark based on two tests, otherwise test in the exam period. Levels are 30%, 50%, 70%, 90%.
